WEATHER OF CONCERN

Weather of Concern

- A series of storms across the Pacific will bring periods of moderate to heavy rain, mountain snow and strong gusty winds across Northern California tonight and continue through the week.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

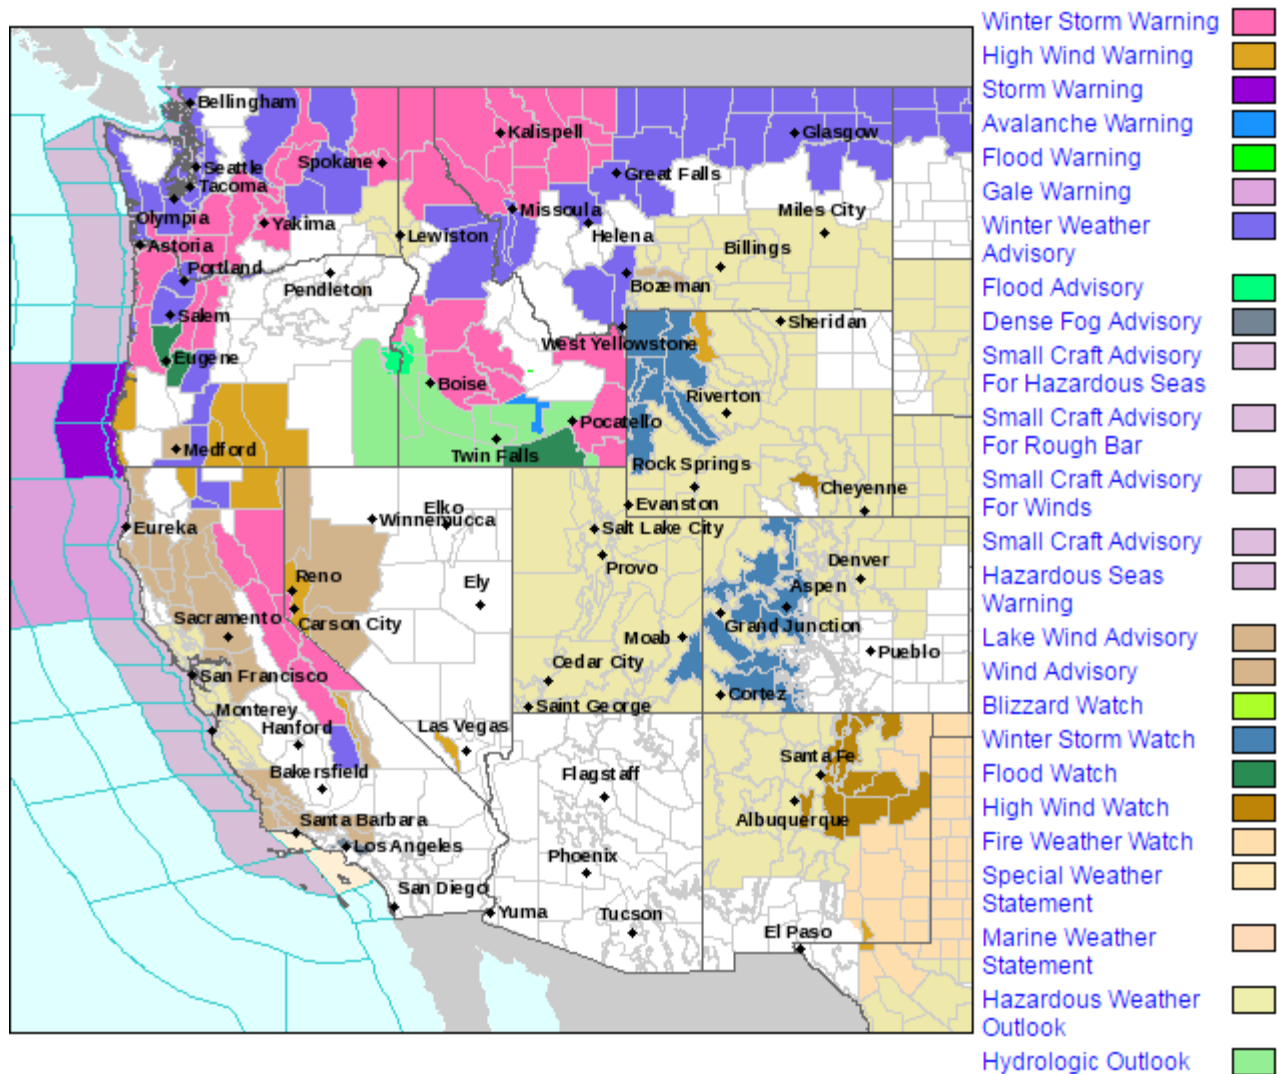

A Pacific storm system will reach the coast tonight or early Monday with moderate to heavy precipitation and gusty southeast to southwest winds. Snow levels will start out above 5000 feet but drop to 3000 feet in the north and 5000 feet in the south once the cold front moves through midday tomorrow. After a break late Monday and early Tuesday, a much warmer system will arrive late Tuesday with more wet windy weather and snow levels above 6000 feet. At that point, a pattern where a Pacific storm system moves in every 2-3 days can be expected through mid February, continuing the wet unsettled and occasionally windy conditions.

SOUTHERN CALIFORNIA

A Pacific storm will bring showers back to Central California this evening and to the region tomorrow morning. Showers with this storm will continue through Tuesday evening. This second storm looks as though it will bring more rainfall to the region than the first storm. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert locations this evening through Tuesday night. The snow level with both storms will be between 7,000 and 8,000 feet. Temperatures will remain near normal through early next week, with mid 40s to mid 50s across the mountains and upper 50s and 60s in the valleys. A ridge of high pressure will build into the region from the Pacific bringing a warming and drying trend Wednesday and Thursday.
